Cordially invites you to a symposium on

The Future of Immunology and Cancer Research

Celebrating 50 years of research since 1968
And our recent move to new laboratory facility

September 6, 2018 | 08:00 AM

Speakers are alumni and friends of the Lautenberg Center
See attached program

Welcome
Concern Foundation Laboratories at the Lautenberg Center
Inaugural Symposium
The Future of Immunology and Cancer Research
Thursday, September 6, 2018
Venue: Lecture Hall “Z”, 3rd floor, Faculty of Medicine

08:00-08:30: Get together

08:30-09:15: Opening session:
Chair: Eitan Yefenof
Ofer Mandelboim
Michael Kurtz
Derek Alpert
Award of the James Sivarten Prize

09:15-10:55: Plenary session 1
Chair: Benny Leshem
09:15-09:40: Dina Ben-Yehuda, Hadassah Medical Center, Hebrew University, Jerusalem, Israel: Targeted nanoparticles in lymphoma.
09:40-10:05: Gal Markel, Sheba Medical Center, Tel-Aviv, Israel: From immune checkpoints to integrative immuno-oncology.
10:05-10:30: Anat Erdreich-Epstein, University of Southern California, Los Angeles, USA: PID1, an intriguing new tumor suppressor.
10:30-10:55: Adit Ben Baruch, Tel Aviv University, Tel Aviv, Israel: Inflammation-driven tumor-stroma interactions in breast cancer.
10:55-: Group photo in lobby

11:00-11:30: coffee break

11:30-12:45: Plenary session 2
Chair: Stella Chausho
11:30-11:55: Sarit Larish, Haifa University, Haifa, Israel: The ARTS connection: protein degradation, apoptosis and tumor suppression
11:55-12:20: Yaacov Ben David, Guizhou Medical University, Guiyang, China: Molecular and micro-environmental factors associated with initiation and progression of leukemia.
12:20-12:45: Polina Srepensky, Hadassah Medical Center, Hebrew University, Jerusalem, Israel: Unraveling novel immune deficiency syndromes: Pathways from patients to bench to bone marrow transplantation.
12:45-13:45: Light lunch
Site visit of new laboratories

13:45-15:50: Plenary session 3:
Chair: David Naor
13:45-14:10: Jonathan Duke-Cohan, Dana Farber Cancer Institute and Harvard Medical School, Boston, USA: New insights into T cell development.
14:10-14:35: Steffen Jung, Weizmann Institute, Rehovoth, Israel: Macrophage Intricacies in Gut and Brain
14:35-15:00: Noam Stern-Ginossar, Weizmann Institute, Rehovot, Israel: RNA modifications sculpts innate immune response to infection.
15:00-15:25: Orly Avni, Faculty of Medicine, Bar Ilan University, Safed, Israel: Social stress as a risk factor for microbiota-dependent autoimmunity.
15:50-16:20: Coffee break

16:20-18:00: Plenary session 4:
Chair: Ruth Gallily
16:45-17:10: Avraham Yaron, Weizmann Institute, Rehovot, Israel: Mechanisms of neuronal wiring.
17:10-35: Roi Gazit, Ben-Gurion University, Beer Sheba, Israel: Immune Effectors and Ancestors.
17:35-18:00: Yaqub Hanna, Weizmann Institute, Rehovot, Israel: Molecular Mechanisms of Embryonic Potency.
18:00 Summary and Outlook.
