

SUNDAY Department of Developmental Biology and Cancer Research

JAN19 Prof. Yifat Merbl

12:10 Weizmann Institute of Science

Lecture Hall Beyond protein degradation: New insights into downstream functions
Dalet, Floor 0 of proteasome-cleaved peptides

MONDAY Young Seminar

JAN20 Lamia Halaseh

12:00 Developmental Biology and Cancer Research

Rubin Identification and Characterization of Asynchronous
Auditorium Replication Timing (ASRT) Regions

MONDAY Department of Microbiology & Molecular Genetics

Dr. Shai Zilberzwige Tal

JAN20 The Broad Institute of MIT and Harvard, The McGovern Institute

9:00 Faculty candidate

Levi Hall, Reprogrammable RNA-targeting CRISPR systems evolved from RNA toxin-
Botnar antitoxins

TUESDAY Department of Medical Neurobiology

JAN21 Prof. Nitzan Censor, Ph.D.

12:05 Sagol School Of Neuroscience, Tel-Aviv University, Israel

The Seminar Novel Pathways for Human Brain Plasticity

Room 4Floor Inducing Rapid Learning & Un-learning

WEDNESDAY Immunology and Cancer Research Seminar

JAN22 Dr. Asaf Spiegel

12:15 Merck KGaA Healthcare R&D

Hall 7 אולם, Exploring Novel Immunotherapies - Insights from pharma R&D
3rd Floor

THURSDAY Department of Biochemistry & Molecular Biology

JAN23 Dr. Daria Amiad Pavlov

12:10 Weizmann Institute of Science

Levi Auditorium Mechano-regulation of Gene Expression in Striated Muscle
Ground Floor
