Farewell Symposium and Celebration of Prof. Simon Benita's Contributions

Over the years, Prof. Simon Benita's pioneering research and boundless dedication have paved the way for groundbreaking advancements in the field of drug delivery and nanomedicine. His work on polymeric nanocarriers, targeted chemotherapeutic nanoparticles, nanoemulsions of cannabinoids and topical formulations has not only enriched our understanding, but also shaped the direction of both academic and translational research.

This special half-day symposium will bring together leading experts, former students and cherished colleagues to present the latest breakthroughs in the domain he helped build and to express our heartfelt gratitude for Prof. Benita's invaluable contributions. It promises to be a gathering as inspiring as his work.

Date: 03.02.2026

Time: 14:00-19:00

Location: Rubin Hall, Ein Karem
